

Important Information Regarding Your Visa-Branded Check (Debit) Card

Non-Visa Debit Transaction

Processing. We have enabled non-Visa debit transaction processing. This means you may use your Visa-branded Check (debit) card on a PIN-Debit Network* (a non-Visa network) without using a PIN.

The non-Visa debit network(s) for which such transactions are enabled are: STAR Network

Examples of the types of actions that you may be required to make to initiate a Visa transaction on your Visa-branded Check (debit) card include signing a receipt, providing a card number over the phone or via the Internet, or swiping the card through a point-of-sale terminal.

Examples of the types of actions you may be required to make to initiate a transaction on a PIN-Debit Network include initiating a payment directly with the biller, possibly via telephone, Internet, or kiosk locations. STAR Network billers are required to display the STAR logo. STAR Network billers must also allow you to choose how your payment is directed. Thus, you could see the STAR logo and choose to direct your payment through the STAR Network. In addition, STAR Bill Payments are not authenticated with a PIN; instead the biller authenticates your identity using known information derived from an existing relationship with you.

The provisions of your agreement with us relating only to Visa transactions are not applicable to non-Visa transactions. For example, the additional limits on liability (sometimes referred to as Visa's zero-liability program) and the streamlined error resolution procedures offered on Visa debit card transactions are not applicable to transactions processed on a PIN-Debit Network.

*Visa Rules generally define ***PIN-Debit Network*** as a non-Visa debit network that typically authenticates transactions by use of a personal identification number (PIN) but that is not generally known for having a card program.
